

PATIENT REPRESENTATIVE GROUP REPORT – MARCH 2013

WHAT IS THE PATIENT REPRESENTATIVE GROUP (PRG)?

The Patient Participation Group (PRG) was set up in 2011.

The aim in setting up the group is to provide a platform through which:

1. Patients can feedback on the current performance of the surgery
2. Patients can drive forward improvements in service provision and
3. The surgery can keep patients informed of changes in the NHS and consequently the way these changes may impact upon the surgery service provision and hence patient care.

Invitations to join the PRG were made to all patients by means of posters displayed in the reception area.

Certain patients who have provided informal feedback to the practice previously and those well known in the community due to voluntary work were also specifically invited to join the PRG.

The group is intended to be dynamic and a permanent poster on display in the waiting room makes clear that patients can join the group at any time. In addition notice of forthcoming meetings is displayed two weeks prior to all meetings and all patients are invited to attend.

In order to make the PRG relevant and in order to help deliver the aims listed above the PRG meetings are attended by Practice clinical staff, the Practice Manager, designated reception staff and invitations are sent to the wider community care team.

PRG AND PRACTICE PROFILE

PRG Group by Ethnicity

Ethnicity	Numbers registered with practice	%	Number in PPG	%	Difference between practice profile and PPG profile
British	75	1.50	1	8.33	+6.83
Irish	14	0.28	0	0.00	-0.28

Male	2555	52	8	66	+14
Female	2280	48	4	33	-15

Analysis of PRG Profile

PRG Group by Ethnicity

Broadly speaking the ethnic makeup of the PRG matches the practice profile with the largest ethnic groups being well represented

PRG Group by Age

The Practice recognises that in the PRG there is an under-representation of younger age groups. The poster invitation to join the PRG was open to all patients and the timing of the meetings – Tuesdays at 1pm – was established in order to enable allow certain cohorts such as young mothers to attend. However despite this the take up in younger age groups remained low.

The Practice attempted to increase participation by directly asking some patients to put themselves forward – the take up to such invitations however remained low. One young mother did attend for one meeting but failed to engage thereafter.

For the next year the Practice will again try and increase participation in the younger age groups by re-advertising the PRG group and by directly approaching some patients.

PRG Group by Sex

The Practice recognises that there is an over-representation of men on the PRG. This is a reflection of the cultural norms as represented by the ethnic breakdown of the population.

PRG FREQUENCY

The PRG is timetabled to meet at least 2 times a year – In October and March. However there is flexibility to meet more frequently if needed. An extra inaugural meeting was held in 2011.

A full list of the meetings to date and the main areas of discussion are provided below.

Full minutes of each meeting are available on the Surgery website www.charlesroadsurgery.co.uk

Date	Main areas of discussion
2 nd June 2011	1.Aims and objectives 2.Election of Chair and Vice Chair 3.Issues: Access to appointments Telephone system Staff training
25 th October 2011	1.Feedback on telephone and staff training 2.Introduction of new complaints procedure 3. Introduction of newsletter
2 nd March 2012	Discussion of survey results Discussion of NHS changes Discussion of Dr retirement and proposed replacement
2 nd October 2012	Introduction of new GP partner Discussion of changes to access to appointments

	Discussion of planned changes to telephone system
26 th March 2013	Discussion of Survey results Proposed introduction of new members

Mrs. Farhat Awan

PATIENT SURVEY

AREAS OF PRIORITY & HOW THEY WERE DECIDED

The Practice has previously used GPAQ as the primary means of assessing performance.

The GPAQ survey cover the following broad areas:

1. The consultation experience with the individual GPs and nurses
2. Experience with receptionists, availability of appointments and waiting times
3. General satisfaction with the Practice

The PRG was satisfied that this survey captured all the data relevant to the PRG.

SURVEY PROCESS

The Practice has previously commissioned *Intime*, an independent private data analysis company to carry out the Survey.

Intime use validated questionnaires, collates and analyse the data gathered and are able to provide comparisons to both GPAQ and the IPSIS MORI GPPS surveys to allow benchmarking.

It was agreed re-commissioning this company would be appropriate for the purposes of the PRG.

Patients were given the questionnaires to complete over the first two weeks of March 2013.

Where language issues prevented a patient or carer from completing the questionnaire, Practice reception staff offered to help with completion of the questionnaire.

RESULTS

1. The consultation experience with the individual GPs and nurses

Q1. About Your Visit to the GP

Today

How good was the GP at: Putting you at ease?

Answer (score in brackets)	Count	Percentage
Very good (100)	68	46.3%

Comments noted on forms

I have been with this practice for 36 years and I am fully satisfied with the service provided.

Would like to have a sit and wait option in the evenings.

Overall excellent service from staff and doctors.

Online booking system would be far more convenient.

No comment, each day is different according to staff on duty, some staff are helpful others are not helpful.

I fill these forms on behalf of my mum, my doctor is someone else. I normally bring my mum here all the time, doctor and nurses are very helpful here. They try their best in what they can do for you.

I understand it's not practical for a doctor to answer a query by telephone during surgery hours, but there is no reason why a patient query cannot be answered after there is no patient at the surgery.

I have been trying to get an appointment for 4 days now, which I think is unacceptable and when finally get through to the receptionists they are rude! I will be looking for a new practice, however I cannot fault the doctor as the service is above satisfactory, and because of this I am still at the practice.

Our reception staff are the best with everyone. We are all happy here.

Although having visited Dr Arif today for the first time the consultation provided was good. My personal choice of doctor is Dr A Zafar as consultation has always been excellent. Thank you.

Everything is cool.

Happy surgery. Friendly staff. Excellent service.

I personally feel that the standards at this GP practice are dropping. The quality of patient care is not at a high standard, regardless of the many doctors, nurses the surgery has. I, over the last few years do not feel very comfortable with the surgery and what it has to offer.

DISCUSSION ABOUT RESULTS

The Patient Survey Results were discussed at the PRG meeting on 26.3.13

1. The consultation experience with the individual GPs and nurses

In general Doctors and nurses score well in the domains with regard to putting at ease, giving time, assessing the medical condition, explaining things and arranging treatment. There were excellent marks with regard to trustworthiness and confidence. Patients were happy to see the Doctor or nurse again. In several domains including in listening, giving time and involving in decision making the Practice scored more highly than the GPAQ average.

2. Experience with receptionists, availability of appointments and waiting times

The reception staff scored higher than the GPAQ average with regard to helpfulness.

The Practice however scored less well with regard to ease of getting through on the phone and lower than the GPAQ average. This is a problem that has been acknowledged by the Practice and highlighted in previous PRG meetings.

The Practice has taken steps during the course of the year to try and tackle these issues – as identified in the Action plan for 2012/13 below.

The Practice has employed an extra member of reception staff and has also invested in another phone line. Resource implications limit the extent to which further improvements can be made in this area however it is recognised that the Practice will continue to strive to improve with regard to these indicators.

The Practice scored higher than the GPAQ average with regards to waiting times once at the surgery.

3. General satisfaction with the Practice

Overall satisfaction and experience levels with the Practice were good. With regard to the overall experience the Practice scored more highly than the GPAQ average and importantly higher than the GPAQ average with regard to recommending the Practice to others – 94% as compared to 82%.

Action Plan in response to suggestions and recommendations by the Patient Participation Group Members

2011/12

Needs Identified	Actions taken
Difficulty in getting through to the surgery during early morning and afternoon to book appointments.	<ol style="list-style-type: none"> 1. Call waiting system introduced in telephone system 2. Patients informed regarding specific timings for requesting repeat prescriptions and other queries so as to keep peak appointment booking times free
Training of reception staff to deal with stressful situations and client service	Two training courses attended by reception staff <ol style="list-style-type: none"> 1. Course "Effective customer services skills" 2. Course "Customer services and patient experience"
High DNA rates	Patients to be written in event of DNA
